Comments

The VATRING patented by VAT guarantees a constant closing torque during the specified cycle life of 10'000 cycles. No service except regreasing of the spindledrive after high bakeout is necessary during this cycle time.

The following torques are required to close the valve:

Valve DN	Hexagon head (mm)	M _{nom} (Nm)	M _{min} (Nm)	M _{max} (Nm)
100	27	90	64	100
