## Product data sheet

Series 653, DN 100 - 350 mm (I.D. 4" - 12")

Ordering No. 653...-.....-.....

## 1 Description

This product is a throttling pendulum valve with isolation functionality. It is intended to use for downstream pressure control applications.

This "Product Data Sheet" is valid for the valve ordering number(s):

|                           | supply voltage        | +24 VDC ( $\pm 10\%$ ) @ 0.5 V pk-pk max.                              |
| Power consumption         | (control / drive)     | 70 W (max.)<br>with optional SPS + 40 W<br>with optional PFO + 10 W    |
| Ambient                   | temperature           | 0 °C to +50 °C max. (<35 °C recommended)                               |
|                           | humidity              | 0 to 95% RH, non-condensing  |
| Interface                 | remote                | Refer to chapter 2.3   |
|                           | service port          | USB-B (USB 2.0)  |
| Sensor                    | connector             | D-Sub, DA-15, female   |
|                           | number of inputs      | 2  |
|                           | signal voltage        | -10 ... +10 V  |
|                           | input resistance      | 100 k $\Omega$   |
|                           | ADC resolution        | 0.1 mV   |
|                           | sampling rate         | 2 ms   |
|                           | power supply (output) | +24 VDC / 1.5 A max. or<br>$\pm 15$ VDC / 1.2 A max. (with SPS option) |
| Position resolution       |                       | 58'000 (full stroke)   |
| Actuator type             |                       | Stepper motor with servo control                                       |
| Pressure control accuracy |                       | 5 mV or 0.1% of setpoint, the higher value applies                     |
| Ingress Protection        |                       | IP 30  |

|                 |                          |                 |

**Series 653, DN 100 - 350 mm (I.D. 4" - 12")**  
**Ordering No. 653..-.....-.....**

**2.3 Interface**

Power Connector

|                 |                                    |   |
|-----------------|------------------------------------|---|
| Connector       |                                    | D-Sub, DA-15, male                        |
| Digital inputs  | input 1                            | interlock open (adjustable with CPA 4.0)  |
|                 | input 2                            | interlock close (adjustable with CPA 4.0) |
|                 | voltage control<br>contact control | 12 ... 24V / 4 ... 8 mA<br>24V / 8 mA     |
| Digital outputs | output 1                           | valve opened (adjustable with CPA 4.0)    |
|                 | output 2                           | valve closed (adjustable with CPA 4.0)    |
|                 | load                               | max. 70 V / 0.1 A                         |

Logic

|                 |                                    |  |
|-----------------|------------------------------------|--|
| Connector       |                                    | D-Sub, DB-25, female                   |
| Digital inputs  | number of inputs                   | 8                                      |
|                 | voltage control<br>contact control | 5 ... 24V / 2 ... 10 mA<br>3.3V / 2 mA |
|                 | number of outputs                  | 4                                      |
| Digital outputs | load                               | max. 70 V / 0.1 A                      |
|                 | number of inputs                   | 1                                      |
| Analog input    | voltage range                      | 0 ... 10V                              |
|                 | input resistance                   | 100 kOhm                               |
|                 | number of outputs                  | 2                                      |
| Analog outputs  | voltage range                      | 0 ... 10V                              |
|                 | load                               | max. 1 mA                              |

EtherCAT

|               |                |  |
|---------------|----------------|--|
| Connector     |                | 2 x RJ45, 8-pin (socket), IN and OUT                             |
| Communication | protocol       | Protocol specialized for EtherCAT                                |
|               | node address   | Explicit device identification or station alias, set by switches |
|               | physical layer | 100BASE-Tx (IEEE 802.3)  |
| Cable         |                | shielded Ethernet CAT5e or higher                                |

CC-Link

|               |                |   |
|---------------|----------------|---|
| Connector     |                | D-Sub, DE-9, female                                       |
| Communication | protocol       | CC-Link V2  |
|               | data rate      | 156, 625, 500 kbps,<br>2.5, 5, 10 Mbps<br>SW configurable |
|               | station number | SW configurable (1– 64)                                   |

DeviceNet

|                |                                     |   |
|----------------|-------------------------------------|---|
| Connector      |                                     | microstyle, 5-pin, male                                   |
| Communication  | protocol                            | DeviceNet, group 2 slave only                             |
|                | data rate                           | 125, 250, 500 kbaud<br>by switch or network programmable  |
|                | MAC ID                              | address 00 - 63<br>by switch or network programmable      |
|                | Profile                             | Generic "B" for valves with cluster option<br>Generic "C" |
| Supply voltage | transceiver at microstyle connector | 24 Vnom, 11 ... 25V; max. 0.5 W                           |

RS485

|                        |                   |  |
|------------------------|-------------------|--|
| Connector              |                   | D-Sub, DB-25, female                         |
| Communication settings | baud rate         | 1200,2400,4800,9600,19200,38400,57600,115200 |
|                        | data bits         | 7 or 8                                       |
|                        | stop bits         | 1 or 2                                       |
|                        | parity bit        | even, odd, none                              |
|                        | topology          | half duplex, full duplex                     |
|                        | network           | point to point, multiple devices             |
|                        | adress range      | 0 ... 255                                    |
| Digital inputs         | number of inputs  | 2  |
|                        | voltage control   | 5 ... 24V / 2 ... 10 mA                      |
|                        | contact control   | 3.3V / 2 mA                                  |
| Digital outputs        | number of outputs | 2  |
|                        | load              | max. 70 V / 0.1 A                            |
| Analog outputs         | number of outputs | 2  |
|                        | voltage range     | 0 ... 10V                                    |
|                        | load              | max. 1 mA                                    |
