VAT – China RoHS 2 Statement

Dear Business Partner

Regarding of the China RoHS 2 Standard, come into effect on 1. July 2016:
The China RoHS 2, is only applicable to a comprehensive range of consumer electrical and electronic products. The Standard Achieving Management Catalogue (First Batch) includes 12 types of products with their scope, definition and the explanations on the scope of applications:
However, if a product covered by the catalogue is used as a component of another product (out of the scope of the catalogue), the catalogue will be not applicable to the product component.
It is the finished product which will define the applicability of the catalogue.
Please aware: The China RoHS 2 is different from EU RoHS 2.

This means our VAT- products are not affected by the China RoHS 2.

With our industrial VAT-products we do not correspond to the China RoHS 2, Basic Catalogue, which is only applicable to a comprehensive range of consumer products of this catalogue.

VAT Group is committed group wide to providing information about development in regulations for consumer products as complimentary services.

VAT Group is committed group wide to environmental excellence and meeting or exceeding regulatory requirements with respect to the use of hazardous substances.

Please feel free to contact the Environmental Program Manager with any further concerns or questions on any matters regarding the content of this VAT – China RoHS 2 Statement.
