Statement regarding "Environment-related Substances to be Controlled ('Controlled Substances')"

With regard to the "Environment-related Substances to be Controlled ('Controlled Substances')" contained in the parts and devices employed in VAT Group products, those Standards or Statements which clarifies

- 1) banned substances,
- 2) substances to be phased out, and
- 3) exempted substances and their uses,

In order to act according the following aims and objectives:

- 1) To prevent the above-mentioned substances from being used for VAT Group products;
- 2) To comply with related laws and regulations;
- 3) To reduce the influence of the above-mentioned on the ecosystem; and
- 4) To contribute to the global environmental protection.
- 5) USA-EPA Toxic Substances Control Act (TSCA), issued on January 6th, 2021 to reduce exposures to five certain chemicals that are persistent, bio accumulative and toxic (PBT) and up-date on 2022.
